About Me

Cybersecurity professional with a software development and military background, holding the CPTS certification and currently pursuing CRTO and CDSA. Hands-on experience in Active Directory exploitation, Kerberos abuse, ADCS exploitation, privilege escalation, lateral movement and post-exploitation through realistic enterprise-focused lab environments

Education & Certifications

Cybersecurity Training

- CPTS – Certified Penetration Testing Specialist – Hack The Box
- CRTO – Certified Red Team Operator (In Progress) – Zero Point Security
- CDSA – Certified Defensive Security Analyst (In Progress) – Hack The Box
- Introduction to Classified Information Security – NAU / GNS
- Cato Distinguished Support Associate - Cato Networks
- Cato Certified Associate - Cato Networks

Technical Skills

Offensive Security & Red Team Operations

- Active Directory Enumeration & Exploitation
- Kerberoasting & AS-REP Roasting
- NTLM Relay Attacks
- Kerberos Abuse & Delegation Attacks
- Active Directory Certificate Services (ADCS) Exploitation
- Privilege Escalation (Windows & Linux)
- Lateral Movement & Pivoting
- Network Enumeration & Post-Exploitation
- Credential Attacks
- Internal Network Penetration Testing
- Technical Reporting & Remediation Recommendations

Offensive Security Tools

- BloodHound
- RustHound
- Kerbrute
- Idapsearch
- Certipy
- BloodyAD
- Impacket Suite
- NetExec
- Evil-WinRM
- Burp Suite
- Hashcat
- John the Ripper
- Nmap
- Wireshark
- Responder
- Metasploit
- SQLmap

Infrastructure & Systems

- Docker
- Linux Administration
- Windows Administration
- Git
- GitHub

Programming & Automation

- Python
- PowerShell
- Bash / Shell
- PHP

Offensive Security Projects & Hands-On Experience

- Completed Hack The Box Pro Labs: Dante and P.O.O.
- Solved over 100 Hack The Box machines across Active Directory, Windows, Linux and Web environments.
- Performed attack chains involving:
 - Kerberoasting & AS-REP Roasting
 - NTLM Relay Attacks
 - Active Directory Certificate Services (ADCS) Exploitation
 - Resource-Based Constrained Delegation (RBCD)
 - Shadow Credentials
 - Privilege Escalation
 - Lateral Movement & Pivoting
 - Domain Dominance
- Utilized BloodHound, Certipy, Impacket Suite, NetExec and BloodyAD to identify and exploit attack paths within Active Directory environments.
- Produced technical reports documenting findings, attack paths and remediation recommendations.

Professional Experience

Full Stack Developer | Plex 4 It | 2025 - Present

- Developed and maintained fullstack applications for Greenvolt, collaborating closely with client stakeholders;
- Automated internal workflows using Python scripting;
- Maintained version control and CI/CD pipelines with Git/GitHub;
- Applied secure coding principles and environment hardening practices;
- Independently managed complex project responsibilities in a corporate environment.

Backend Developer | Startup Stockonspot | 2024 - 2024

- Development and maintenance of APIs following Hexagonal Architecture principles;
- Optimization of database queries and search performance;
- Implementation and management of caching mechanisms using Redis to reduce latency and system load;
- Conducted code reviews and enforced best practices;
- Containerization of services using Docker.

Military | Portuguese Army | 2019 - 2024

- Operated within structured and high-responsibility environments;
- Followed strict operational procedures and security protocols;
- Developed strong discipline, accountability, and team coordination skills;
- Worked under pressure and time-sensitive conditions.
